### 5-Year Goals & Aspirations

Over the previous three years my biggest goal and aspiration has been to complete my bachelor's degree. My focus has been primarily academic, and I have enjoyed the successes and challenges of studying at Marquette University. As I near the end of my college career, my goals are beginning to shift. While I will remain academically focused over the course of the next three semesters, I aspire to succeeding in my professional career and personal life as well.

This previous summer I began my first professional internship. I became a part of the Supply Chain Development Program at Johnson Controls, placed with a procurement team. The summer break was dedicated to learning about the different aspects of procurement. I aspire to keep my drive for continuous learning alive through my internship during the school year. Post-graduation I look forward to applying the knowledge I have gained in school into the workforce. I have set a goal for myself to be promoted twice within five years of graduation.

Succeeding academically and professionally are not the only goals I have set. Being of service to others is something that I have felt deeply rewarded from. I aspire to work for a company that values giving back to the community and offers volunteering opportunities to their employees. In my personal life I look forward to dedicating my free time to helping others.
