Professional Aspirations

Over the course of the next five years, I have a few goals I hope to accomplish. I hope to join a larger firm with a solid supply chain program or rotational. Here I hope to learn more of the skills of the trade in the real world, while cultivating relationships with those I work with. By the end of these five years, I hope to be able to consider myself a generalist expert in the fields of operations, logistics, and continuous improvement. I hope to be using principles such as lean and six sigma in order to push high level improvements and cost savings for my company, or to be working as a consultant for others, effecting change and waste reduction. I also hope to work in a medium-to-large city, with abundant resources and opportunities. If I am able to achieve these goals, I would consider the five years well spent.
