STAFDA

by Aaron Ebrahim

My professional aspirations for the next five years are an exciting topic for me. I want to be highly marketable and educated for my position. The opportunity the University of Nebraska-Lincoln provides for higher education allows me to open many doors at a young age. My educational goals are to have three certifications: CPA, APICS, and J.D. My business goals are to own a cash flow-positive supply chain. I want to begin this life-long commitment with a positive start. In five years, achieving these certifications and goals I believe will help me implement these tasks in helping the family business. Business education will make early successes more probable. Decision-making in a simulation is the closest experience to the real event. The principles taught in simulations apply to real-world applications. Repetition to real-world events will enhance my decision-making skills down the road. Competitions are always good fun.

Running the Inchange simulation is a phenomenal experience in understanding a manufacturing company's operations. Creating these moments in my academic career will support my professional endeavors. Listening to industry leaders is something I look forward to. I hope the information at this event propels me towards a new trajectory in business. I hope to leave our family business in a better position than today.
